

R: Thesis/Internship Inquiry - Rafael Urbina Hincapié

Organizer	Irene Spada <irene.spada@unipi.it>
Meeting time	This event occurred 5 months ago (Wed 5/21/2025 10:30 AM - 11:30 AM)
My response	Not yet responded
Required attendees	Irene Spada, Rafael Ignacio Urbina Hincapié, Filippo Chiarello
Message sent	Tue 10/7/2025 2:50 PM

Dear Rafael,

It took longer than initial expected, but here we are with a proposal!

Unfortunately, Errequadro does not have any space for internship at the moment, so we tried to find an alternative solution to meet at our best everyone needs.

There is a possible paid internship at the University in the scope of a larger collaboration with Errequadro. As a university activity, it is more focused on research on patents instead on industrial and business application.

The internship addresses a data integration problem considering multimodal and heterogeneous data sources. A possible case study is long-distance liquid transportation systems. The goal is supporting process like risk management or maintenance. Leveraging hybrid techniques (e.g., traditional algorithms and machine learning), the project aims at building high-quality datasets to train AI models and enabling proactive detection of critical issues.

If this topic can be interesting for you, we can have a meeting on 13 October at 17:00 or 14 October at 15:00 to discuss details and start.

If you are not interest, I can propose you other topics, but they would not include a paid internship. Also in this case, we can have a meeting one of the above-mentioned date.

Let me know

Dear Rafale,

Thank you for your message. I hope your exam went well last week !!

For what concern our discussions, I've talked with prof. Fantoni who is setting up a meeting to explore next steps, but his lectures have started with a tight schedule. We will get back to you shortly with a possible time slots.

Dear Professor Spada,

I hope this email finds you well, I just wanted to do a brief follow up on our discussions and also notify that today I will be having my last exam to meet the thesis/internship requirement by the university, from tomorrow onwards I will be ready and available to discuss and (or) start eventually at whatever date it suit you best.

Please let me know when could we meet to continue the discussions,

Best regards, Rafael.

Dear Professor Spada and Professor Fantoni,

Thank you for your message and for keeping me updated. I completely understand that this is a busy time, and I appreciate the clarity regarding the timeline. I'll be looking forward to reconnecting and continuing the internship discussions in September.

In the meantime, I'm glad to know that Professor Fantoni is now in copy, and I remain available for any coordination regarding the meeting with Errequadro or alternative proposals we discussed earlier.

Wishing you both a restful August and a smooth end to the season.

Best regards, Rafael.

Dear Rafael,

Hope your exams are going well (or went well if you've already finished 😊) !

Thanks for the update and information, for what concern the internship procedure we will discuss again in September (all admin stops in early August and late July is a busy period not good to start something new). Next, I've added in copy here in our conversation prof. Gualtiero Fantoni, who can organize meetings with Errequadro / alternative solution as discussed in our last call.

Oggetto: Re: Thesis/Internship Inquiry - Rafael Urbina Hincapié

Dear Professor Spada,

Good morning. I hope this email finds you well.

As discussed in our last meeting, I have reviewed the requirements for the internship's commencement. I can confirm that the start date is flexible, contingent upon the completion of the necessary agreement documents between the company, you (the professor), and myself (the student).

However, there is one key constraint regarding the total hours: the internship must comprise between 675 and 700 hours, completed within a period of 4 to 6 months.

Additionally, a detailed document outlining the internship program must be completed. This document requires signatures and submission to the internship commission at least 15 working days prior to the proposed start date of the internship.

The specific details for completing this document can be set at later stages of the process. Therefore, I await information regarding when the meeting with Erre Quadro can be scheduled.

Thank you for your time and consideration.

Best regards,

Rafael Urbina.

Dear professors Chiarello and Spada,

I fully understand that these steps need time, regarding the possible topic, I find it interesting and would be happy to work on something related to.

Please do let me know if I can provide any documents or information. I await to meet with Erre Quadro or to meet with you again.

Best,

Rafael Urbina.

Dear Rafael,

I've talked with Erre Quadro about the possible internship.

We need to verify some bureaucracy as you might expect, meanwhile they are proposing the following idea: analysis on patent data for improving the targeting in lead generation activities, thus leverage patent analysis to support our marketing strategies. This would be a different approach compared to the examples presented by Anna and Francesca during the recent lecture.

Does it sound interesting to you?

I'm verifying the administrative staff, so let me know what you think about the topic.

Best

Irene

Oggetto: Thesis/Internship Inquiry - Rafael Urbina Hincapié

Dear Professors Chiarello and Spada,

I am writing to express my interest in pursuing my Master's thesis or a curricular internship under your supervision.

As I had the pleasure of discussing with Professor Spada, I find the areas of patent analysis and text analysis particularly engaging and aligned with my academic and professional interests.

However, I am also open to exploring any other research opportunities or projects that you may have ongoing or planned.

My intention is to begin working on my thesis starting this coming September, at the beginning of the first semester of the Academic Year 2025/2026.

Thank you for your time and consideration. I look forward to hearing from you.

Please find my curriculum vitae attached for your review.

Sincerely,

Rafael Urbina Hincapié.
